DETAILED ACTION

Double Patenting

As to the double patenting rejections enumerated in the previous Office Action, only one Terminal Disclaimer was filed. This terminal disclaimer for U.S. Application 10/704,376 (US Patent Publication 20050102010 A1) is noted and the double patenting rejection in regards to this application has been withdrawn. However, the remainder of the double patenting rejections for U.S. Application numbers: 10/793,549 (US Patent Publication 20050102012 A1), 11/002,609 (US Patent Publication 20050119717 A1), 10/656,722 (US Patent Publication 20040143154 A1) and 11/051,823 still stand rejected for reasons previously stated in the prior Office Action.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 65-66, 68, 74-75, 77, 93-94 and 96 are rejected under 35 U.S.C. 102(b) as being anticipated by Lau et al. (US Patent Publication 20020019580 A1). Lau et al. discloses a cardiac harness constructed for minimally invasive delivery with a plurality of undulating strands that comprise hinge elements. The hinge elements are activated from a power source, specifically an electrical power source. Therefore since the hinges are reciprocates of electrical charge, the hinges are electrodes. These hinges may be constricted from Nitinol, which is a metallic alloy.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 65-101 are rejected under 35 U.S.C. 103(a) as being obvious over Alferness et al. (US 6,169,922) in view of Lau et al. (US Patent Publication 20020019580 A1). Alferness et al. discloses the claimed invention, as previously made of record, except for the hinge elements. Lau et al. teaches that it is known to use hinge elements, on page 8, paragraph 93, for the purpose of applying increased resistive force with increased bending which may be capable of reversing the remodeling process that occurs post-infarction. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the jacket as taught by Alferness et al. with the hinges as taught by Lau et al., since such a modification would enable the harness volume and shape to be modified to meet individual patient's heart geometry in addition to facilitate an increasing resistive force on the heart to aid in the reversal of the remodeling process.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
